

Étudiant en **2e année de Bachelor informatique**, passionné par la **programmation bas niveau**, le **développement de kernel** et la **conception de systèmes d'exploitation**. Pratique régulière du **C** et de **l'assembleur x86/RISC-V**, avec une attention particulière au fonctionnement interne des OS (gestion mémoire, processus, amorçage). Actuellement en train de construire **Kira Linux**, ma propre distribution Linux, de l'init system jusqu'au bootloader. Recherche une alternance d'un an à partir de septembre 2026.

PROFESSIONAL EXPERIENCE

End-of-year Internship

Société Générale - May 2026 to July 2026

Responsibilities

- Writing scripts to reference database keys used in the front-end (for translation)
- Improvement of the "guide tour" feature: a functionality to present each page and its features
- Improvement of the site's translation system

Linux Distribution Creator

Kira Linux - Since 2026

Responsibilities

- Creation and maintenance of a custom Linux distribution (Kira Linux)
- Fork and configuration of the Linux kernel
- Integration of existing system tools (eudev, runit...)
- Building the boot system and user environment
- Management of the build system and initialization scripts

Kernel Developer (RISC-V)

Kernel In RISC-V Architecture - 2026

Responsibilities

- Bare-metal RISC-V kernel from scratch in C and assembly
- Custom bootloader, UART driver (16550), interrupt handling (CLINT)
- Memory management via Sv39 page tables, scheduler
- Tested on QEMU

EDUCATION

2027

(Upcoming) Bachelor in Development • Sup de Vinci Paris

Work-study program (2 weeks school / 2 weeks company) focused on full-stack and mobile development and project management. Practical program covering front/back, databases, APIs, common frameworks and team collaboration (Scrum).

2026

Preparatory cycle • Sup de Vinci Paris

Core foundations in the following areas: Hardware, Algorithms, Virtualization, Web development, Databases, OS, Development

2024

General Baccalaureate • Lycée Jules Ferry - Conflans-Ste-Honorine

Specializations: Math & Digital Sciences and Computer Science + Advanced Math option

SKILLS

Programing languages

- C
- x86/RISC-V Assembly
- Shell/bash
- Python
- HTML/CSS/JS

OS

- Linux (Debian)
- iOS
- Android
- Windows
- MacOS

Tools

- VMware/Qemu
- Git
- Pack MS Office
- Notion

Certifications

- Deep Reinforcement Learning (Free online formation at HuggingFace.com)
- Pix (506 certified Pix points : P-M2KPC4PT)

Languages

- French
- English (B2 level)

INTERESTS

Loisirs

- Video games / Simracing
- Cycling
- 3rd cycle of percussions
- Rubik's cubes
- Badminton
- Chess
- Crossfit
